

YEAR 3 GEOGRAPHY: TRADE INCLUDING NATURAL RESOURCES

Fieldwork:

Links to Previous Learning:

EYFS – Understanding the world (people, cultures and communities)
 EYFS – Understanding the world (natural world)
 Y1 – The UK
 Y1 – The Seasons
 Y2 – Rainforests
 Y2 – Continents and Oceans

Links to other Y3 learning:

Plants around the world – Biomes and climate zones.
 Mountains topic

Links to future learning:

Y4 – The UK
 Y4 – Europe and European Biomes
 Y5 – Coasts
 Y5 – North America
 Y6 – South America

Key Learning

- To understand the UK is in the Northern hemisphere.
- Why food comes from different places around the world.
- How is food processed and transported around the world?
- Recap on climate zones and Biomes.
- To locate the tropics as being between the Tropics of Cancer and Capricorn.
- To understand the consequence of changing land use – deforestation.
- To describe how land is used for food production in different climate zones.
- To know what longitude and latitude lines are and hemisphere to describe locations.
- To explore the concept of fair trade.
- To explore ways we can support traded goods to ensure it is fair.

Key Vocabulary:

Tier 2

Locate – to find the position or place of

Weather- state of the atmosphere at a particular place and time as regards heat, cloudiness, dryness, sunshine, wind, rain,

Transported- a vehicle used to carry people or goods from one place to another.

Harvest- the gathering of ripe crops.

Continents- any of the world's main continuous expanses of land (Europe, Asia, Africa, North and South America, Australia, Antarctica).

Rainfall – is the amount of water falling from the sky.

Production – a process of making or producing goods.

Distribution –giving out and delivery

Consequence –something that happens as a result of something.

Tier 3

Climate areas around the world with specific patterns of weather.

Biomes - Biomes- are regions of the world with similar climate (weather, temperature) animals and plants.

Deforestation - the cutting down of forests or groups of trees which is then turned into non-forest use

Fair trade - is a way of buying and selling products that allows the farmers to be paid a fair price for their produce, and have better working conditions.

Tropics of Cancer and Capricorn - The line called the Tropic of Cancer marks the northern edge. Its latitude (distance from the Equator) is 23°27' N. The line called the Tropic of Capricorn marks the southern edge

Livestock - as farm animals who are raised to generate a profit.

Natural resources- Anything that is found in nature that can be used by living things is a natural resource. This includes water, forests, fossil fuels, minerals, plants, animals and even air.

Trade links - a system of trading between two countries in which each country attempts to balance its trade with that of the other
