Key learning	Possible evidence
<p>In the UK, the day length is longest at mid-summer (about 16 hours) and gets shorter each day until mid-winter (about 8 hours) before getting longer again.</p> <p>The weather also changes with the seasons. In the UK, it is usually colder and rainier in winter, and hotter and dryer in the summer. The change in weather causes many other changes. Some examples are numbers of minibeasts found outside; seed and plant growth; leaves on trees; and type of clothes worn by people.</p>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Can name the four seasons and identify when in the year they occur</li> <li><input type="checkbox"/> Can describe weather in different seasons over a year</li> <li><input type="checkbox"/> Can describe days as being longer (in time) in the summer and shorter in the winter</li> <li><input type="checkbox"/> Can describe other features that change through the year</li> </ul>
